

Mouse CD164 Protein, Fc Tag (MALS verified)

Catalog # CD4-M5253

Synonyms

CD164, MUC-24, Endolyn, MGC-24

Source

Mouse CD164 Protein, Fc Tag (CD4-M5253) is expressed from human 293 cells (HEK293). It contains AA Gln 24 - Asp 162 (Accession # [Q9R0L9](#)).

Predicted N-terminus: Gln 24

Molecular Characterization

CD164(Gln 24 - Asp 162) Q9R0L9	Fc(Pro 100 - Lys 330) P01857-1
-----------------------------------	-----------------------------------

This protein carries a human IgG1 Fc tag at the C-terminus.

The protein has a calculated MW of 41.2 kDa. The protein migrates as 65-100 kDa when calibrated against [Star Ribbon Pre-stained Protein Marker](#) under reducing (R) condition (SDS-PAGE) due to glycosylation.

Purity

>95% as determined by SDS-PAGE.

>95% as determined by SEC-MALS.

Formulation

Lyophilized from 0.22 µm filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

Shipping and Storage

This product is shipped at ambient temperature.

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- -70°C for 3 months under sterile conditions after reconstitution.

ACRO Quality Management System

- [QMS\(ISO, GMP\)](#).
- [Quality Advantages](#)
- [Quality Control Process](#)

SDS-PAGE

Mouse CD164 Protein, Fc Tag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 95% (With [Star Ribbon Pre-stained Protein Marker](#)).

SEC-MALS

The purity of Mouse CD164 Protein, Fc Tag (Cat. No. CD4-M5253) is more than 95% and the molecular weight of this protein is around 130-160 kDa verified by SEC-MALS.

Background

This gene encodes a transmembrane sialomucin and cell adhesion molecule that regulates the proliferation, adhesion and migration of hematopoietic progenitor cells. The encoded protein also interacts with the C-X-C chemokine receptor type 4 and may regulate muscle development. Elevated expression of this gene has been observed in human patients with Sezary syndrome, a type of blood cancer, and a mutation in this gene may be associated with impaired hearing.
