

Recombinant Monoclonal Anti-MUC16 Antibody, Rabbit (M1D08)

Catalog # HGS-M2713

Background

Recombinant Monoclonal Anti-MUC16 Antibody, Rabbit (M1D08) is a MUC16 primary antibody for IHC application. MUC16 is a membrane-tethered mucin that contributes to a protective mucous barrier on epithelial surfaces. MUC16 supports cell adhesion and barrier-related functions through its heavily glycosylated extracellular region. It is localized to the plasma membrane and also detected in extracellular vesicles and the extracellular region. MUC16 expression is high in the respiratory system and female reproductive system.

Product Specifications

Host Species	Rabbit
Isotype	Rabbit IgG, Rabbit Kappa
Clone	M1D08
Application	IHC-P
Form	Liquid
Clonality	Monoclonal
Reactivity	Human
Synonyms	CA125
Concentration	0.9~1.1 mg/ml
Specificity	React with MUC16 protein on the membrane of target cell/tissue

Experiment Protocol

Storage

Shipped at 4°C, Blue Ice. Store at +4°C for short term (1-2 weeks). Store at -20°C for long term. Avoid freeze / thaw cycle. Upon delivery aliquot. The shelf life is 30 days from the date of opening.
